

AMENDMENTS TO THE CLAIMS

1. (Original) A heat-shrinkable opaque white film comprising a core layer; and white back and front layers, the core layer having a chromatic color with low transparency to light at wavelengths of 380 to 500 nm or an achromatic color.
2. (Original) The heat-shrinkable opaque white film according to Claim 1, wherein the core layer contains at least one selected from the group consisting of black, yellow, red, and brown pigments.
3. (Currently amended) The heat-shrinkable opaque white film according to one of Claims 1 ~~and or~~ 2, wherein the film has a transmission factor to light at wavelengths of 380 to 500 nm of 5% or less.
4. (Currently amended) The heat-shrinkable opaque white film according to one of Claims 1 ~~and or~~ 2, wherein the core layer has an achromatic color and wherein the film has a transmission factor to light at wavelengths of 200 to 600 nm of 3% or less.
5. (Currently amended) The heat-shrinkable opaque white film according to ~~any one of Claims 1 to 4~~ Claim 1, wherein the film has a W-value of 60% or more on a surface of the front layer.
6. (Currently amended) The heat-shrinkable opaque white film according to ~~any one of Claims 1 to 5~~ Claim 1, wherein the film has been prepared by co-extruding back and front layers with a core layer and drawing the coextrudate.
7. (Currently amended) A shrink label comprising the heat-shrinkable opaque white film of ~~any one of Claims 1 to 6~~ Claim 1; and a preprinted ink label layer arranged on or above a surface of the front layer of the film.

8. (Original) A labeled container comprising a container body; and the shrink label of Claim 7 arranged on or above the container body.
